**56%** of staff logged on over three times a week

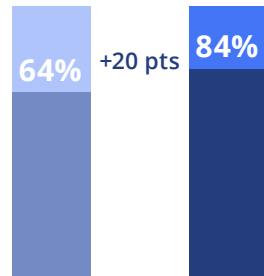

**ADOPTION**

**64%** adoption in week one

**84%** adoption by the end of the program

**71%** average adoption

"The 2Spark solution was implemented in logistics: a fast-changing area within the PSA Group which demanded different tools and organizational changes. For the transformations to succeed, we had to reach the local management on thirteen sites. As such, it was too complicated to explain the various challenges created by the changes during classroom training as we were used to doing. The 2Spark digital platform met all our needs in full. All the operators we worked with recommended the program's proactive approach, sense of fun and adoption rate."

Stéphane Lauret, Human Resources Division  
Ergonomist – Plant of the Future Project – Operator Assistance – PSA
